RECOMMENDATION LETTER

for Dr. Bartłomiej Podpora

Leiber GmbH and its subsidiary InterYeast Spolka z o.o. are companies which scope of the main activity is to produce brewer's yeast products like dried yeast, yeast extracts, mannooligosaccharides and beta glucanes for feed and food purposes. It is European leader concerning such activity and was established in 1954 by Franz Leiber.

For past 10 years Dr. Podpora proved his skills in laboratory management, laboratory equipment and analysis according company requirements, quality control systems supervision according norms ISO 9001, ISO 22000 and GMP+ Standard B2 and overall production management issues.

In 2013 he was on-site Project Manager for the investment called EVAP 2013 (budget 1.5mio €). Project concerned building and assembling new evaporator and distillery installations in order to increase whole plant capacity and improve energy balance.

Hereby we confirm that Dr. Bartłomiej Podpora as Project Manager fulfilled all his tasks within scope listed below:

- Execution of all tasks within planned time schedule,
- Control costs and quality of all building and construction issues
- Supervising deliveries of the all equipment
- Supervising and participating in all site erection tasks
- Communicate all issues and consult all technical solutions with Senior Project Manager
- Disruption of old concrete tanks and prepare place for new investment
- Construction of the concrete plate, steel construction, walls, roof of building for evaporator
- Construction of pipe lines for supply of evaporator (steam, condensates, cooling water, yeast...)
- Supervising all electrical and wiring works
- Collecting additional offers and placing orders for required equipment and services
- Sign together with Company Manager for all costs within the frame agreed with the SPM
- Performing final acceptance tests (FAT) and signing up factory acceptance protocols with Senior Project Manager
- Optimizing of the new system

Dr. Ulrich Schmitz

Director Technology and Production
Leiber GmbH
